• Sysop Mode (with crashing that does not prevent use - see below), COM port setup works in Sysop Mode (via adding symbolic link to the proper /dev devices).. It can only connect to one station at a time, but if you connect to a conference server you can talk to as many stations as that conference server supports - just make sure every connects to that same conference server and you can have a group chat.. Before Apple Mac came into my life I used to use EchoLink (VoIP) but now before I start trying to download that software does any Ham out there know if/where that software can be found on a safe web site.

Hi, Not sure if this is the correct place for this but here goes I am a fully licensed Amateur Radio man and I cannot use any antennas at all so my chances of World Wide contacts are zero.. EchoLink for iOS version 2.2 is now available in the App Store This is a 64-bit build that is fully compatible with iOS 10 and modern iOS devices.. This is the commonly recommended method for configuring Sysop Mode if you intend to switch between User-Mode.. Requires iOS 8.0 or later. • Exit EchoLink and re-open to select a new Profile • after making settings changes, exit and re-open EchoLink (this prevents crashes after settings changes) Workarounds What was not tested Hardware tested Graphics: • GPU: • Driver: Additional Comments KB3VWG. With EchoLink for iPhone a licensed amateur radio operator can make contact with any other amateur operator (HAM) in the world..) • Program crashes upon exiting in Sysop Mode • Explorer View in Sysop Mode sometimes does not appear (after a settings change causing a reconnect) • The index and search functionality of the Help are not present/do not appear (explorer-like navigation appears and is functional.. Otherwise, Sysop Mode works FLAWLESSLY A partial workaround is to: • Create a separate profile for Sysop Mode, enabling the Profile Chooser on start (this prevents a crash when switching modes using MAIN Profile).. e Application sometimes crashes when a Settings window is closed in Sysop Mode, crashes when switching to a Sysop Profile, etc.. If you have a Mac rather than a PC, you can download and install EchoMac instead to begin the validation process.. My call sign begins with Gzero and I am in the East Midlands in the UK My Apple Mac Mini is late 2012 and is running Yosemite. b0d43de27c [5000 Unit Patch](#)
