
Malayalam Newsticker Incl Product Key

Malayalam Newsticker is a lightweight software application whose purpose is to help users place a small screen space on their desktop which reveals news from the Malayalam language newspaper, which is published in India. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to view headlines right on your screen on the breeze, without having to go through installation steps. By default, this RSS ticker provides the news in the Malayalam language. You are not offered the possibility to change the language. It sports a clean and simplistic layout that displays the headlines directly into the primary panel and offers only a few configuration settings to tinker with. Malayalam Newsticker gives you the possibility to read the entire article using your default web browser by simply clicking on the desired news title, refresh the current information, and make the utility remain on top of other programs. It is important to mention that you are allowed to use a hotkey for refreshing the information but it cannot be reassigned. Since it doesn't require much computer knowledge to configure the dedicated parameters, even rookies can master the utility with minimum effort. However, more experienced users may find it pretty inconvenient to work with a tool that doesn't come packed with advanced features for helping you to add your own favorite RSS feed, customize its appearance, and specify the updating frequency, just to name a few suggestions. During our testing we have noticed that Malayalam Newsticker displays data accurately, and no errors showed up throughout the entire process. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. To sum things up, Malayalam Newsticker comes packed with limited features for helping you read online news. Malayalam Newsticker Download Link: DuckDuckGo is a free anonymous search engine that does not keep any search data. It promises users to protect their privacy while searching for Web sites and services. DuckDuckGo offers search by image, local information, browser speed, as well as the location of the computer. Features: - Free search engine, free of data collection, no tracking - Image search - Customize search result as per your preference - Speed search - Blacklisting of sites for reasons of privacy

What's New in the Malayalam Newsticker?
